

Digital Honey Trap

- **L-H-T:**
 - Low cost
 - Human weakness
 - Targeted access
- **A-D-A-D:**
Army • DRDO scientists • Air Force/Navy • Diplomats + Retired + Families
- **5 Stages:**
 1. Fake Profile
 2. Start Chat & Groom
 3. Ask Small Questions
 4. Get Secrets
 5. Blackmail/Pay
- **D-S-P-J:**
Digital discipline
 - Social media rules
 - Psychological training
 - Joint agency work

1. What is Digital Honey Trap?

- New version of spying: Fake online romance/friendship to steal secrets
- **Honey Trap:** Build trust with love/money → extract info → blackmail or pay
- Made easy by social media + encrypted apps (WhatsApp, Telegram)

2. Why Pakistan's ISI Loves This (L-H-T)

- **Low cost:** Just fake profile + internet
- **Human weakness:** Targets loneliness, greed, need for love
- **Targeted access:** Turn trusted Indians into sources (better than hacking)

3. Who They Target (A-D-A-D)

- Army jawans & officers
- DRDO scientists (seniors)
- Air Force & Navy personnel

- Diplomats abroad + retired soldiers + families
- Anyone posting uniform photos, job info, or daily routine online

4. How It Works (5 Stages – Count on Fingers!)

1. **Fake Profile:** Pretend woman/officer (profile 2-3 years old to look real)
2. **Groom:** Friend request → slow chat → build "love"/trust (weeks/months)
3. **Probe:** Innocent questions → "How was work?" → deeper job details
4. **Extract:** Share real secrets (troops, missiles, projects)
5. **Control:** Blackmail (chats/photos) OR pay via crypto

Enabler: Social media shows your life + private chats hide everything

5. Real Cases (Proof It's Happening)

Classic Cases:

- Pradeep Kurulkar (DRDO, 2023): Fake "Zara" → missile secrets
- Satendra Siwal (Embassy Moscow, 2024): Shared defence info for money
- Amaan Shaikh: Helped trap Navy with SIMs/crypto

Recent 2025-2026 Cases (Threat Growing!):

- Jan 2026: Ambala man → Fake women profiles → leaked Army/Air Force secrets
- Jan 2026: Jaisalmer/Pokhran youth → Honey-trapped → arrested for ISI spying
- Dec 2025: Retired Army officer (Gujarat) → Lured & shared info
- Oct 2025: Alwar resident → "Woman" trap → military details to ISI
- Jun 2025: Navy staff → Online gaming honey trap ("Priya Sharma")

- May 2025: CRPF ASI → Honey-trapped & dismissed

Many more: Railway employee, Karwar naval leak, etc.

6. India's Response

Prevention Rules:

- No uniform photos/job details online
- Instagram: View only
- Warning: 150+ fake profiles (2-3 years old)
- Random phone checks

Action:

- Track handlers (IP addresses, crypto payments)
- All agencies together: Army Intel + IB + NIA + Police
- Hybrid defence: Cyber tools + Psychology training

7. Remaining Problems

- Hard to spot early (slow grooming)
- Privacy vs security balance
- Some ignore rules
- New apps keep coming

8. Key Lessons (D-S-P-J)

- Digital discipline = National duty (your posts matter!)
- Social media needs strict rules + training
- Psychological strength: Spot tricks + report suspicious chats safely
- Joint work: All security teams as one (like armed forces integration)

: One careless online friend can harm India.
